SKILLS

Soft Skills
- Strong teamwork and communication skills
- Adaptability and rapid learning in dynamic environments
- Excellent problem-solving and time management abilities

Extracurricular Involvement
- Active member of DBS Cricket Society
- Active member of DBS Computer Society

ACADEMIC & PROJECT SKILLS

Leveraging hands-on projects throughout my BSc, I have developed strong programming and development skills, including:

Programming Languages:

- **C#:** Developed desktop and web applications (Hospital Management System, Recruitment Agency Portal, Phone Directory Application) emphasizing object-oriented programming and file I/O.
- **Python:** Automated data processing tasks (Employee Payslip Generator) by reading CSV files and generating formatted output.
- **SQL:** Designed and implemented normalized databases using SQL Server; created ERDs, stored procedures, and views.

Web & Application Development:
- Built secure web applications using ASP.NET MVC (Event Management System) featuring CRUD operations, user authentication, and robust error handling.
- Employed UML documentation for clear system design and project planning.

Software Engineering & Project Management:
- Applied Agile methodologies to manage project timelines and deliverables across multiple software development projects.
- Conducted comprehensive system analyses to ensure scalable and maintainable codebases.
